

**Amendments to the Abstract:**

Please replace the previous Abstract with the following redlined Abstract:

**ABSTRACT OF THE DISCLOSURE**

~~Proposed is~~In a method and a system for work time recording, ~~in which a~~ data recording client ~~(10,...,16)~~ records biometric data and/or data on physical condition of the user ~~(1)~~, and transmits it together with the user data over a first communication channel ~~(30/31)~~ to the central unit ~~(20/21)~~. The user ~~(1)~~ is identified based on the transmitted biometric data and/or data on physical condition and biometric data and/or data on physical condition of users stored in the user database ~~(40)~~. The analyzed data are transmitted to a remuneration recording module ~~(50)~~, and are evaluated and/or checked by means of the remuneration recording module ~~(50)~~.
